

California Proposition 65 Compliance Statement

California Proposition 65 (officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986) refers to the California legislation that was intended by its authors to protect California citizens and the State's drinking water sources from chemicals known to cause cancer, birth defects or other reproductive harm, and to inform citizens about exposures to such chemicals.

As Groschopp is a downstream user and not a raw material manufacturer, we are reliant on our upstream suppliers for the information relating to California Proposition 65 compliance. Where our suppliers have given their statements as a letter of intention, this is not legally binding so we ourselves cannot sign a legally binding document on such a basis. In any case, by accepting our order, our suppliers confirm to deliver only California Proposition 65 compliant raw materials. Additionally, please note that we do not routinely analyze our suppliers' products for non-intentionally added substances.

Groschopp hereby states that to the best of our knowledge, in regards to California Proposition 65 compliance, Groschopp products do not contain substances of concern and our products are not intended to cause consumer exposure to any substances during normal product use.

This information applies only to Groschopp products "as shipped" from our facility and may become invalid if the product is altered from its original state or combined with other components as a final assembly.
