

REACH Compliance Statement

The Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) Regulation (EC 1907/2006) addresses the use of chemical substances and the potential impact they have on human health and the environment. The European Chemicals Agency (ECHA) maintains a Candidate List of substances of very high concern (SVHC) which is made available on their website (<http://echa.europa.eu>). The Candidate List is frequently updated and is subject to periodic monitoring by Groschopp. Whenever new substances are included in the Candidate List, suppliers are asked to provide materials to the updated specifications.

As Groschopp is a downstream user and not a raw material manufacturer, we are reliant on our upstream suppliers for the information relating to REACH compliance. Where our suppliers have given their statements as a letter of intention, this is not legally binding so we ourselves cannot sign a legally binding document on such a basis. In any case, by accepting our order, our suppliers confirm to deliver only REACH compliant raw materials. Additionally, please note that we do not routinely analyze our suppliers' products for non-intentionally added substances.

Groschopp hereby states that to the best of our knowledge, in regards to the requirements of European Union Regulation (EC 1907/2006), Groschopp products do not contain any substances included in the above mentioned revision at a concentration of 0.1% by weight or higher.

This information applies only to Groschopp products "as shipped" from our facility and may become invalid if the product is altered from its original state or combined with other components as a final assembly.
